Pasta Rino, Around the Globe...

Tekinak Food Industry and Trade Co. Inc. first ventured into the industry with flour production in 1984, and since 1995, the range of products produced under three different brands, namely "Berrak Pasta-Flour-Semolina", "Gül Pasta," and "Pasta Rino," have been reaching consumers in Turkey and around the globe.

The resources allocated for infrastructure, the renewed production facilities, the quality control units, and the Anatolian durum wheat, all come together to help Pasta Rino to produce delicious tastes with high standards and make Pasta Rino an essential ingredient of memorable meals.

In addition to reaching consumers in every corner of Turkey thanks to a network of over 60 dealers and distributors spread across the country, Pasta Rino exports its products to 80 countries in 5 continents.

As the volume of pasta export from Turkey steadily increases, Pasta Rino continues to be the number one pasta exporter in the region, which also calls for setting higher goals on our behalf.

Berrak, as one of the few companies in Turkey doing business in pasta, flour, and semolina industry with integrated production, follows the industry trends and

keeps its facilities up-to-date. With added machinery in 2010, our production capacity has been significantly increased.

With the new investments in 2012, we increase our productive capacity to 300 tons per day.

The great value we invest into our brand enables us to produce high quality products, which are certified by TSE (Turkish Standards Institution), ISO 9001:2015 and have FSSC 22000 Food Safety Quality Management System certificates.

Human health is our utmost priority, and in Berrak production facilities, we make sure that a hygienic environment is maintained in all stages of production.

We are well aware that the future of Turkey lies in good education, and accordingly, we continually contribute to educational activities in our region.

By taking part in major exhibitions around the world, like the ones in Dubai (Gulfood), Japan (Foodex), France (Sial), and Germany (Anuga), Berrak introduces its products to greater masses, and we take legitimate pride in owning such brands that are in demand from every part of the world, thanks to the delicious taste and high quality of our products.
